

# PERC Admission Operations Engine – Communication Architecture & Preparation Checklist

## Communication Philosophy

The objective of the system is **not to chat with leads**.

The objective is to **automate the complete admission workflow**, provide the right information at the right time, guide the lead to the appropriate human, and ensure that **no enquiry is ever lost**.

Every lead is treated as an active workflow until one of the following occurs:

- Admission Completed
  - Lead Closed
  - Lead Marked Lost
  - Lead Archived
- 

## Input Streams

A lead can enter the system from multiple channels.

### Digital Channels

- WhatsApp
- Website Contact Form
- Website Chat Widget
- Instagram Direct Messages
- Facebook Messenger
- Google Business Profile
- Email
- SMS
- Phone Calls
- QR Code Forms

### Offline Channels

- Walk-in Enquiries
- Referral Enquiries
- Events

- Seminars
- Education Fairs

Regardless of the source, **every enquiry follows the same workflow.**

---

## Output Streams

The system should **always respond through the same channel from which the enquiry originated**, whenever technically possible. This provides a seamless experience and avoids forcing the user to switch platforms.

### WhatsApp Enquiry

Output:

- WhatsApp message
  - PDF attachments
  - Brochure
  - Contact details
  - Meeting links
  - Follow-up messages
- 

### Instagram Enquiry

Output:

- Instagram Direct Message
  - Quick replies
  - Brochure link
  - Website link
  - Contact details
- 

### Website Enquiry

Output:

- Email
  - SMS (optional)
  - WhatsApp (if opted in)
  - Confirmation page
  - Brochure download
  - Contact details
-

## Google Business Profile

Output:

- Google Business Messages
  - WhatsApp (if initiated)
  - Email
  - Call scheduling
- 

## Phone Call

Output:

- SMS
  - WhatsApp
  - Email
  - Calendar invitation
- 

## Internal Output Streams

Apart from communicating with the lead, the system also communicates internally.

### Admin Dashboard

- New Lead
  - Lead Assigned
  - Follow-up Due
  - Call Scheduled
  - Meeting Scheduled
  - Admission Completed
  - Payment Pending
  - Lost Lead
  - Escalation
- 

## Notification System

Notifications via

- Dashboard
- WhatsApp
- Email
- Push Notifications
- Slack (optional)

---

## Reports

Daily Reports

Weekly Reports

Monthly Reports

Performance Reports

Lead Reports

Admission Reports

Revenue Reports

Source Reports

---

## Communication Rule

The system should **never generate random AI responses**.

Instead, every response should come from one of the following:

1. Pre-approved Message Templates
2. Course Documents
3. Brochures
4. Fee Structures
5. Admission Information
6. Contact Information
7. Calendar Invitations
8. Meeting Confirmations
9. Reminder Messages

The system's role is to **select the correct content**, not invent it.

---

## Documents to Prepare Before Development

The automation engine depends on structured content. Before implementation, PERC should prepare the following knowledge assets.

## 1. Message Template Library ★

This is the most important document.

It should contain templates for every scenario.

Examples:

- Welcome Message
- General Enquiry
- Course Enquiry
- Fee Enquiry
- Scholarship Enquiry
- Branch Enquiry
- Faculty Enquiry
- Hostel Enquiry
- Admission Process
- Documents Required
- Demo Class Invitation
- Meeting Confirmation
- Follow-up 1
- Follow-up 2
- Follow-up 3
- Recovery Message
- Admission Confirmation
- Payment Reminder
- Welcome Student
- Thank You Message

---

## 2. FAQ Response Library

Frequently asked questions with standardized responses.

Examples:

- What courses do you offer?
- What are your fees?
- What are your timings?
- Which branch is nearest?
- Do you provide study materials?
- Do you provide hostel?
- Is transportation available?
- What are the scholarship criteria?
- How can I contact faculty?
- What is your admission process?

---

### 3. Course Information Repository

For every course:

- Course Name
- Description
- Duration
- Eligibility
- Subjects
- Curriculum
- Learning Outcomes
- Batch Timings
- Faculty
- Course Brochure
- Course PDF

---

### 4. Fee Repository

For every course:

- Fee Structure
- Installment Options
- Scholarship Information
- Discounts
- Refund Policy
- Payment Methods

---

### 5. Branch Repository

For every branch:

- Address
  - Google Maps Link
  - Contact Number
  - Working Hours
  - Branch Manager
  - Parking Information
  - Nearby Landmarks
-

## 6. Admission Process Document

Step-by-step admission flow.

Example:

Enquiry

Counselling

Demo Class

Admission Form

Document Verification

Fee Payment

Student Registration

Batch Allocation

Welcome

---

## 7. Brochure Library

Maintain the latest brochures.

Examples:

- Institution Brochure
- JEE Brochure
- NEET Brochure
- School Tuition Brochure
- Foundation Courses
- Scholarship Programs

---

## 8. Follow-up Template Library

Different follow-up templates for different stages.

Examples:

No Reply after 2 Hours

No Reply after 1 Day

No Reply after 3 Days

Demo Reminder

Call Reminder

Meeting Reminder

Admission Reminder

Payment Reminder

Recovery Campaign

---

## 9. Notification Templates

Internal notifications for admins.

Examples:

New Lead Created

Follow-up Due

Call Scheduled

Meeting Missed

Admission Completed

Payment Pending

Lead Lost

Lead Recovered

---

## **10. Meeting Templates**

Call confirmation

Meeting invitation

Reschedule confirmation

Cancellation notice

Demo invitation

Demo reminder

---

## **11. Calendar Rules**

Working hours

Meeting duration

Buffer time

Holiday calendar

Maximum meetings/day

Rescheduling rules

---

## 12. Automation Rules

Business rules that control every workflow.

Examples:

- Follow up after 2 hours
  - Cancel follow-up if lead replies
  - Escalate after 24 hours
  - Send reminder before meetings
  - Stop workflow after admission
  - Restart workflow for recovered leads
- 

## 13. Lead Status Definitions

Clearly define every pipeline stage.

Example:

New

↓

Information Shared

↓

Waiting for Response

↓

Interested

↓

Call Scheduled

↓

Meeting Completed

↓

Demo Scheduled

↓

Admission Pending

↓

Admitted

↓

Inactive

↓

Recovery

↓

Lost

↓

Closed

---

## 14. Lead Classification Rules

Examples:

Hot Lead

Warm Lead

Cold Lead

Returning Lead

Referral Lead

High Priority

Scholarship Candidate

VIP Lead

---

## 15. Analytics Dictionary

Every metric should be defined.

Examples:

- Total Leads
- Leads by Source
- Leads by Course
- Conversion Rate
- Average Response Time
- Average Admission Time
- Demo Conversion
- Follow-up Success Rate
- Lost Lead Percentage
- Revenue
- Most Popular Course
- Peak Enquiry Time

---

## 16. Activity Timeline Events

Every action should be logged.

Examples:

Lead Created

Brochure Sent

Fee Structure Sent

Course Details Sent

Reply Received

Call Scheduled

Meeting Scheduled

Meeting Completed

Demo Completed

Admission Confirmed

Payment Received

Workflow Closed

---

## 17. System Configuration

Business settings such as:

- Working hours
  - Office holidays
  - Auto-response enable/disable
  - Follow-up timings
  - Escalation timings
  - Default meeting duration
  - Notification preferences
- 

## Final System Architecture

The PERC Admission Operations Engine consists of **11 core engines**, each responsible for a specific aspect of the automation.

1. Lead Capture Engine
  2. Response Template Engine
  3. Workflow Engine
  4. Scheduler Engine
  5. Conversation Timeline Engine
  6. Follow-up Engine
  7. Call & Meeting Coordination Engine
  8. Notification Engine
  9. Analytics Engine
  10. Recommendation Engine (Next Best Action)
  11. **Automation Orchestrator Engine** – the central brain that continuously evaluates every active workflow, manages timers, validates conditions, coordinates all engines, triggers automations, cancels obsolete tasks, and ensures every lead progresses correctly through its lifecycle.
- 

## Product Goal

The success of the PERC Admission Operations Engine is **not measured by how intelligently it chats**, but by how effectively it reduces manual work, standardizes operations, prevents lead leakage, keeps every

stakeholder informed, and maximizes enquiry-to-admission conversion through disciplined workflow automation.
