

PERC Admission Operations Engine — Entity Relationship Diagram

An ER diagram is a visual map used to design databases by showing **entities**, their **attributes**, and the **relationships** between them. The diagram below mirrors your (PERC) schema using Mermaid's crow's-foot notation (same style as your hockey pool sample image).

How to view this in VS Code

1. Install the extension "**Markdown Preview Mermaid Support**" (or "**Mermaid Chart**") from the VS Code marketplace.
2. Open this file in VS Code.
3. Press `(Ctrl+Shift+V)` (or `(Cmd+Shift+V)` on Mac) to open the Markdown preview.
4. The diagram below will render automatically.

Notation key

- $\boxed{||--o\{}$ → one-to-many (one record on the left can relate to many on the right)
- $\boxed{||--||}$ → one-to-one
- $\boxed{\text{PK}}$ → Primary Key
- $\boxed{\text{FK}}$ → Foreign Key
- $\boxed{\text{UK}}$ → Unique Key

Entity groups

- **Identity & Access:** (USERS)
- **Core CRM:** (LEADS), (COURSES), (TAGS), (CHANNELS), (LEAD_COURSES), (LEAD_TAGS)
- **Messaging:** (CONVERSATIONS), (MESSAGES), (MESSAGE_ATTACHMENTS), (TEMPLATES)
- **Timeline & Workflow Engine:** (EVENT_TYPES), (TIMELINE_EVENTS), (WORKFLOW_INSTANCES), (WORKFLOW_HISTORY), (AUTOMATION_RULES)
- **Promise Engine (scheduled actions):** (PROMISES), (PROMISE_EXECUTIONS)

- **Human Tasks:** TASKS, MEETINGS
- **Admissions Pipeline:** ADMISSIONS, STUDENTS
- **Supporting Data:** DOCUMENTS, NOTIFICATIONS, ANALYTICS_EVENTS, SETTINGS, AUDIT_LOGS, FAQs, BRANCHES
